

# Feedback is sought on village

QUEENSLAND Transport is seeking public input into the Varsity Station Village project.

A Queensland Transport spokesperson said the project "was in the community consultation phase and a web-based survey was available for public input.

The survey is located at [www.varsitystationvillage.qld.gov.au](http://www.varsitystationvillage.qld.gov.au) and on the back of the community newsletter delivered to households near the village site.

The newsletter is also available from Queensland Transport on 1800 031 562 and online.

The feedback will help Queensland Transport create a vibrant community around the new Varsity Lakes railway station.

The village features integrated transport infrastructure, with work likely to start when Varsity Lakes Station opens in 2010.
